PLACEMENT RATES AND TYPES OF EMPLOYMENT OBTAINED BY GRADUATES

The source of the Placement Rates and Types of Employment provided in the chart above is from employment verifications completed by graduates, employers, or employment records from the Equifax Work Number database.

For more information about how the placement rates are calculated, please contact the NUC University – Florida Technical College Vice President of Strategic Business Development and Career Services.

PLACEMENT RATES REPORTED TO FLORIDA COMMISSION FOR INDEPENDENT EDUCATION

In accordance with Florida Commission for Independent Education standards, the calculation of rates includes students who graduated from a program from July 1, 2023 to June 30, 2024, were employed in any position whether in-field or not (“Graduates Employed”), were in active military service (“Graduates in Active Military Service”), or were enrolled in another post-secondary program before November 30, 2024 (“Graduates Enrolled in Another Post-secondary Program”). The Graduates Employed figure includes employment that began before enrollment, during the program, or after graduation. The calculation of this rate does not include students who graduated from a program and were unable to work due to a medical condition, death, or incarceration (“Graduates Unable to Work”); or graduates who attended the institution on a student visa or other temporary immigration status, and who did not seek employment in this country (“Foreign Non-Seeking Graduates”).

Placement rates are calculated as follows:

Graduates Employed + Graduates in Active Military Service + Graduates Enrolled in Another Post-secondary Program

Total Graduates – (Graduates Unable to Work + Foreign Non-Seeking Graduates)
